Dear Hiring Team,

I am writing to express my interest in an IT position within your organization. As a recent Master's graduate in Information Technology with over a year of hands-on professional experience, I bring a versatile skill set that includes Front-end development, ML/AI solutions, IT support, and UI/UX design.

Throughout my career, I've had the opportunity to work with esteemed organizations, where I contributed to a range of impactful projects. At **InfoxIT**, I provided critical IT support, troubleshooting and maintaining systems to ensure smooth daily operations. At **Neurabits**, I focused on front-end development, building responsive and user-friendly interfaces that enhanced user experience. In my most recent role at **Dotskilled**, I applied ML/AI techniques to solve real-world problems, showcasing my ability to bridge software development with intelligent systems.

Beyond technical development, I also have a strong eye for design. I use **Figma** to create intuitive, user-centered designs that complement my front-end development work. My ability to move seamlessly from design to development allows me to deliver cohesive and polished digital experiences.

I am excited about the opportunity to contribute to a forward-thinking team where I can apply my skills and continue to grow. I am confident that my multidisciplinary background and passion for technology would make me a valuable asset to your organization.

Thank you for considering my application. I would welcome the opportunity to further discuss how I can contribute to your team. Please feel free to contact me at your convenience.

Warm regards,

Ramesh Giri
